

THE STATE OF TEXAS

GOVERNOR

*To all to whom these presents shall come, Greetings:
Know ye that this official recognition is presented to all observing:*

Energy Efficiency Day

October 7, 2020

Texans know that responsible stewardship of our environment must be a priority as we continue to utilize available natural resources while also preserving the many treasures that Texas provides. Internationally renowned for our energy production and technological advancements, Texas holds the keys to future success in energy efficiency by leading in the development of revolutionary technologies for the energy industry.

Energy efficiency is the balance of better performance while using less energy—all while lowering consumer costs for residences, businesses, and industries. Reliable, affordable energy is vital not only to producers, consumers, and the environment but also to our overall economic prosperity, and cutting energy waste saves American consumers billions of dollars on their utility bills annually. Implementing smart, clean energy policies and programs helps boost economic opportunities and job creation, and boasts an impressive 2.2 million Americans working in the energy efficiency sector.

I commend the network of energy efficiency groups and partners who have designated October 7th as Energy Efficiency Day to raise awareness of smarter energy use. I encourage Texas residents to contribute to sustainability efforts by learning more about energy efficiency and practicing smarter energy use in their daily lives. Together, we can continue moving toward a brighter and more sustainable future.

First Lady Cecilia Abbott joins me in wishing you the best.

In testimony whereof, I have signed my name and caused the Seal of the State of Texas to be affixed at the City of Austin, this the 1st day of October, 2020.

Greg Abbott
Governor of Texas
